Subject Index

A
AChE reactivation 84
Acetylcholinesterase (AChE) 185
Acetylcholine esterase 84
– receptor 84, 408
Acidification defect 266
Acinar cells 340, 361
Action potentials 318
Active Na transport 204
– sodium-potassium transport 160
Adenosine 58
Adenylate cyclase activity, rat heart (atria) 1
Adrenalectomy 27
Adrenaline 111, 160, 272
α-Adrenergic stimulation 217
Aerobic glycolysis 119
α-Agonist phenylephrine 104
Airway obstruction 421
Airways receptors 281
Albuterol (salbutamol) 160
Aldosterone 22
– -induced sodium transport 354
– treatment 354
Alkalinization 266
Amiloride 354
Amino acid(s) 193, 354
– aciduria 143
Anaesthesia 421
Anion substitution 34
Anoxic injury 71
Antidiuretic hormone 167
Apical membrane 424
Armin 185
Arrhenius equation 408
Arterial smooth muscle 77
Asymmetric compression 174
– decompression 174
ATP 71, 119, 178

– dependence 178
– turnover 119
Atomic absorption spectrophotometry 198
Atrial slow action potentials 435
Automatic ventilation 421
Autonomic nervous system 380

B
Barbiturate anaesthesia 281
Basolateral HCO_3^--transport 43
– membrane 254, 424
– – vesicles 427
Beta-blockade 217
Bicarbonate permeation 34, 43
– reabsorption 266
– transport 427
Bicarbonaturia 266
Bilayers 433
Binocular responses 304
Biological transport 160
Blood flow 217
– –, peripheral 380
– –, regional 414
– gas 223
Body temperature 418
Brain phosphatidylserine 433
– stem 421
Brattleboro rat 167
Breathing, onset of 287
– pattern 281
Brown adipose tissue 414
Brush border membrane 266
– – vesicles 58
α-Bungarotoxin (α-BuTX) 185

C
Ca-activated K permeability 246
Ca current 111

Ca inflow 293
Ca influx 340
Ca release from intracellular Ca stores 340
Ca^{2+} 107, 272, 391
Ca^{2+}-activated K^+ channel 361
Ca^{2+} binding by troponin 396
Ca^{2+} concentrations 277
Calcitonin 167
Calcium 198, 262, 368, 385
– channel 435
– – blocking agents 368
– conductance 111
– influx 77
cAMP 111, 277
Carbonic anhydrase 34
Cardiac anoxia 71
– muscle 368
– myocytes 71, 111
Cardiovascular responses 223
Carrier-mediated diffusion 427
Catecholamines 272
Cation channels 361
Caudal trigeminal nucleus 213
Cell-attached patches 178
Cellular K^+ activity 52
Cell lysis 71
– membrane(s) 22, 178
– – potential 14
– surface-reactive antibody O4 324
Central chemosensitivity 380
– cooling, pigeon 228
Cerebellum 193
cGMP 277
Channels in planar bilayers 433
Chloride transport 315
Choline 315
Cholinesterase inhibitors 185

Cholinoreceptor 185
Chronotropic response 1
Circulatory transport function 217
Cis-inhibition 254
Citrate 254
Cl^-/HCO_3^- exchange 43
Cl^- sensitive microelectrodes 43, 315
Clearances of inulin 333
CO_2 272
CO_2 production 346
Collagen 239
Collecting tubules 346
Colon 22, 354
–, K transport 22
Comparative physiology 262
Compound action potentials 318
Conductance changes 43
Conducting fluids 209
Contractile force 198
– process 396
Contraction 107
Contracture development 71
Contrast/response function 304
Control of breathing 281
Coprodeum 354
Coronary arteries 277
Cortical thick ascending limb of Henle's loop 52
Corticospinal tract (CST) 132
Corticosteroid hormones 27
Cotransport 52
Crossbridge attachment 391
– cycling rate 385
Culture 324
Cycloleucine 143
Cysteine 143
Cystine 143
L-Cystine 143
Cystinuria 143
Cytoplasm 340
Cytosolic enzymes 71
Cytosol glucocorticoid receptors 321

D

Decompression sickness 174
Deconvolution 217
Deoxyglucose 233
Depolarization 193
– -release relation 293
Diabetes mellitus 97
Dibutyryl-cAMP 246
Dicarboxylate transport 254
Diluting segment 315
Distal convoluted tubules 346
– nephron segments 346
– tubules of rat kidney 167
Diuresis 266
DOCA treatment 27
Domestic fowl 354
Dorsal medulla 193
Drop counter 209
Dynamic activity 213

E

Earle's solution 239
Egg Volk phyphatidylcholine 433
Electrical potential difference (PD) 354
– properties 324
– resistance 204
Electrolyte reabsorption, renal 167
Electron probe 167
– – X-ray microanalysis 340
Electrophysiological analysis 34, 43, 91
Electrophysiology 239, 246
–, distal colon 22
Endocrinology 160
Endoplasmic reticulum 340
Endothelial cells 77
Endothelium-dependent dilation 77
End-plate current(s) 185, 408
Energy metabolism 160
Environmental temperature 64
Enzymatic activity 84
Enzyme release 71
Epinephrine 160
Epithelia of lower gut 354
Evoked disynaptic EPSPs 132
Excitability 293
Excitatory postsynaptic currents (EPSCs) 293
Exocrine acini 361
– pancreas 340
Expiratory flow rate 228
External cooling, pigeon 228
– sodium 152
– surface charges 125

F

Feature specific responses 304
Fetal pulmonary fluid 287
Fibronectin 239
Flow rates measurement 209
Fluctuation analysis 125
Food intake 64
Force-frequency relations 198
Force-velocity relation 396
Forelimb motoneurones 132
Forskolin 1
Frog kidney 6
Fumarate 254
Furosemide 52, 315

G

Garter snakes (*Thamnophis spp.*) 262
Gastric mucosa 152
Gentamicin 333
GFR 97
Glucagon 167
Glucocorticoid receptors 321
Glucose 346
– consumption intestinal 233
– production 104
– transport 14
– – intestinal 233
– uptake 321
Growth 64

H

H^+-ion efflux 266
H^+-ion secretion 266
Halothane 421
HCO_3^--transport 43
Heart cell membrane 178
– cells 71
Heart muscle 101,198
–, myocardial blood flow 217
– ventricle 178
Heat-rearing 213
– exposure 64
– production 228
Helium transport functions 217
Hepatic artery 104
Heterogeneity of myocardial blood flow 217
Hexokinase 233
^{3}H-methylsuccinate 254
Huddling newborn Zucker rats 418
Human chorionic gonadotropin 246
Hyperaldosteronism 22
Hyperbaria 174
Hypoglossal nerve activity 421
Hypoxia 77, 368

I

^{125}I-lysozyme 333
Inactivation 368
Indicator transit time 217
Indomethacin 77
Inert gas dilution method 217
Inhibition of lysozyme degradation 333
Inotropic response 1
Insulin 160
Intestinal mucosa 233
Intracellular Ca 6
– Cl 6
– chloride activity 152
– K^+ 6
– ^{42}K diffusion 101
– microelectrodes 239
– Na 6
– pH 6, 272
– recording 132
– sodium activity 14
Intrapulmonary foam 287
Inward rectification 178
– rectifier 402
Ionic channels 297
– replacements 246
Ion permeabilities 43
– sensitive microelectrodes 6
– transport 340
Isolated heart cells 71
– membrane patch 178
– organ 209
– renal tubules 262
Isometric relaxation 368
– tetanic tension 396
Isoproterenol 272
D,L-Isoproterenol 1

J

Jejunal enterocyte 427
Jejunum 427

K

K current 297
K current, heart 178

K permeability 246
K^+ channel(s) 361, 424
Kallikrein 27
Kidney 6, 14, 52, 58, 167
– cortex, medulla and papilla 97
–, L-cystine transport 143
–, diluting segment 315
–, distal nephron 346
–, protein reabsorption 333
– proximal tubule 34, 43
–, rat 254
–, single channel recordings 424
–, transport of pyrazionate + urate 262
Krebs medium 385

L
Lactate 119, 346
– production 104
Lanthanum 262
Leydig cell 239, 246
Li^+/K^+ solutions 361
Limb immobilization 321
Limulus 107
Lithium 254
Load dependence 368
Local anesthetics 297
Low flow rates 209
– molecular weight protein 333
Lucifer Yellow CH 324
Lung compliance 281
– stability 287
Lysine 143
Lysozyme 333

M
Maleate 254, 266
Mammalian myocardium 368
Mechanical properties 391
Medulla 193
Membrane potential 6, 119, 239, 246, 408
– properties 324
Mesenchymal cell 239
Metabolic CO_2 production 346
Metabolism 58
Methylsuccinate uptake 254
Microanalysis-ionic concentration 430
Microdissected nephron 27
Microelectrode(s) 14, 43, 246, 272, 430
– studies 152
Micropuncture 167, 430
Microsomal Na^+-K^+-ATPase activity 97
Microspheres 414
Midbrain 91
– raphe nuclei 91
Mitochondrial swelling 71
Monolayer self-assembly 433
Motornuclei 132
Muscle 160, 402
– activation 396
– architecture 374
– fibres 185
– length 374
– mechanics 396
– of spiny lobster 293
– protein synthesis 321
–, ventricular 198
Muscularis 233
Myocardial blood flow 217
Myocytes 111
Myosin ATPase activity 391
– light chain 385
– – chain kinase 107

N
N_2 solubility 174
NA^+/K^+ pump in rat portal vein 119
Na channels 297
– current 297
– transport, active 204
Na^+-$2Cl^-$-K^+-cotransport 52
Na^+-free Ringer 152
Na-K-ATPase 97
Na-K-pump 160
Na^+-K^+-ATPase 27
Na^+/K^+ gradients 361
Na^+/K^+ pump 6, 119
Na,K-ATPase 204
NaCl cotransport 152
– intake 354
Neonate 418
Nephron 27
– segment 346
Nerve terminals 293
Nervous system 324
Neuroblastoma cells 297
Neuroglia 324
Neuromodulator 193
Neuromuscular junction(s) 84, 408
Neurons, short propriospinal 132
Neurotransmitter 193
NH_4^+ 272
Nifedipine 368
Nodal membrane of frog nerve 125
Node of Ranvier 125
Non-nicotinic synaptic mechanisms 318
Noradrenaline 272, 414
Norepinephrine 77
Nucleotide 277

O
O_2 consumption 119
Obesity 418
Obidoxine chloride 84
Ocularity 304
Oligodendrocytes in culture 324
Orientation and direction sensitivity 304
Ouabain 14, 160, 204, 246
– on intracellular activities of ions 6
Oxidative metabolism 346
Oxygen consumption 64
– – in perfused rat liver 104

P
Paired stimuli 185
p-aminohippurate 254
Pancreas 361
Pancreatic exocrine cells 340
Papillary muscles 368
Paracellular path 204
Parathyroid hormone 167
Patch clamp 111, 424
– – study 361
Pattle theory 287
P_{CO_2} 34
Percoll-gradient centrifugation 427
Perfluorochemicals 174
Perfluorodecalin 174
Perfluorotripropylamine 174
Perfused rat liver 104
Peripheral blood flow 380
Peritubular cell membrane 34, 43
pH 34
pH effects 402
Phentolamine 272
Phosphatase 233
Phosphate 391
Phosphatidic acid 435
Phospholipase D 435
Phosphorcreatine (PCr) 119
Phosphorylation 385
Picoliter samples 430
Pilocarpine 340
Portal vein 119
Postganglionic neurones 318
Potassium 193, 324
– activity in cells 52
– channels 402
– conductance 361
– current 178
–, intracellular diffusion 101
– permeability 315
– transport 22
Preganglionic axons 318
Probenecid 254
Procaine 297
Propranolol 272
D,L-Propanolol 1
Prostaglandins 77
Prostigmine 185
Proximal convoluted tubules 346
– straight tubule 143
– tubular acidosis 266
– tubule 6, 34
– – of frog kidney 14
Pulmonary resistance total 281
Pyramidal IPSPs 132
Pyrazionate 262

R
Radial motornuclei 132
Radioimmunoassay 77
Rat jejunal enterocyte 427
Rats 213
Rectifier, delayed, inward 402
Rectifying channels 178
Reflex mechanisms 132
Regional blood flow 414
Renal acidification 266
– basolateral membrane vesicles 254
– brush border vesicles 58
– clearance studies 333
– dicarboxylate transport 254

- kallikrein 27
- proximal tubules 424
- reabsorption 333
- - of egg-white lysozyme 333
- transport 143
- tubular fluid 430
- tubule(s) 262, 315

Reoxygenation damage 71
Respiratory frequency 228
- mechanics 281
- responses 228
- work 281

Resting gastric mucosa 152
Rodent hindlimbs 321
Rubidium conductance 361

S

Sacrolemma 272
Salivary gland 361
Sarcoplasmic reticulum 396
Sarin-poisoned frog neuromuscular junctions 84
Sb microelectrodes 266
Scorpion toxin 297
Scrotal thermal afferents 91
Secretin 1
Secretory granules 340
Serotonin 77
Shivering 223, 228
Short-circuit current (SCC) 204, 354
Shortening velocity 385
Signal cord 228
Single cation channels 361
- channel current 178
- - recordings 424

Skeletal muscle 160, 272, 318, 402, 408
Skinned coronary arteries 277
- fibers 107

Skin permeability 204
Slow action potentials 435
Smooth muscle 107
- - energetics 391
- - regulation 385

SO_2 breathing 281
Sodium 254
- channel(s) 125, 354
- -dependent dicarboxylate transport 254
- -- transport systems 266
- -potassium transport 160
- gradient-energized concentrative transport 58
- transport 22

Soleus muscle 160, 272
Soybean phosphatidylcholine 433
Spinal cord 223, 324
Stimulus-induced release of taurine 193
Stopped-flow microperfusion 266
Streptozotocin 97
Stretch 391
Submandibular gland 361
Surface cells 152
- charge 125
- pH 272
- spreading 287

Surfactants 287
Sympathetic excitation 380
- inhibition 380
- nerve stimulation 104
- tone 380

α-Symphathetic nerve stimulation 104
Synaptic cleft 408
- currents 185
- potentiation 185
- transmitter release 293

Synthetic lipids 433

T

T_4 production 64
Taenia coli 391
Taurine 193
Temperature 213
- dependence 408

Tension development 277
Testis 239, 246
Tetra-N-alkylammonium ions 315
Tetrodotoxin 1, 125, 193, 293, 297
Thalamus 91
Thermoafferent signal processing 91
Thermoreception 213
Thermoreceptors 213
Thermoregulation 91, 223, 228
Thermoregulatory behaviour 418
Thermoresponsive neurons 91
Thick ascending limbs 346
Thyroid function 64
Tidal volume 228
Tissue phosphagen content 119
(TMB-8) 77
Toad skin 204
Transmitter 408
Transport of glucose 14
Tricarboxylic acid cycle intermediates 254
Trigeminal thermoreceptors 213
Triton X-100 277
Tubular acidification 266
- pH 266

Twitch contraction times 374
- relaxation time 374
- time characteristics 374

Tyrode's solution 77
Tyrosine 333

U

Urate transport 262
Urinary excretion 97
Ussing-chamber 354

V

Vagal control 281
Vanadate 204
Vascular smooth muscle 119
Vaseline gap voltage clamp technique 402
Ventilation 421
Ventricular muscle 198
- strips 101

Ventrobasal thalamus 91
Verapamil 77, 368
Veratridine-stimulation 193
Visual cortex 304
Voltage clamp 185, 297
- - technique 402

X

Xenon clearance 414
X-ray microanalysis 340

Z

Zymogen granules 340
